

PROTECTIVE DOORS

CLEAR FLEXIBLE STRIP DOORS

Temperature control for walk-in freezers and coolers, refrigerated trucks and outside doors. Provides a rugged barrier for control of heat, dust, drafts, insects and noise.

- Reduces energy consumption and costs
- Helps maintain consistent temperature inside walk-in cooler and freezer
- Allows easy passage of personnel, pallets and forklifts
- Strips have smooth round edges and are clear for visibility
- Durable clear vinyl strips are easy to clean or replace if damaged
- Easy to install - all necessary hardware and full instructions are included
- Each strip slides into aluminum mounting creating a strong and secure hanging system
- Each strip door is custom made from a specially formulated Vinaflex compound - USDA/FDA approved
- When selecting strip width, thickness, and overlap, the following considerations apply: 1) ease of passage, 2) type of traffic, 3) size of door, 4) temperature differential, 5) draft or wind and 6) cooler or freezer
- Measure the width and height (jamb to jamb) of door. Standard curtains should be 6" higher than door height and one strip width (4", 6" or 8") wider than door width. Standard thickness: .060 and .080

Please call and we can help determine what strip door is best for your application

FLY CONTROL UNIT

ADHESIVE BOARD LIGHT TRAP

Improved UV light output and adhesive insect attraction system effectively captures flying insects **On Contact**.

- FDA and USDA accepted for use in food prep areas under current codes and guidelines
- Operates silently and continuously 24 hours a day
- Improved level of flexibility to position traps in corners, narrow corridors and other key wall areas

Intended for large, open areas
Size: 18" w x 10" h x 6" d
Two 40 watt insect lights

GT200 Portable or Wall Mount

REPLACEMENT PARTS

- EL05 40 Watt Bulb
- EL60 1 Pk. (10) 4" x 16" Glueboards
- EL61 1 Pk. (10) 9" x 16" Glueboards

DUNNAGE RACKS

- Durable, heavy duty one piece, seamless plastic construction
- Use in walk-in coolers and freezers
- Great for beverage and other bulk displays, end of isle and island displays
- All are 12" high
- Six legs for additional strength
- Color: Gray

Provides a sanitary, inexpensive and practical way to get product off the floor. Made of USDA approved materials and NSF listed.

Item Number	Dimensions	Capacity
PDR48	22" x 48"	2200
PDR60	22" x 60"	2200

We Gladly Welcome

AIR DOORS

USDA and FDA compliance, UL listed.

For effective use in meat packing plants, food processing plants, retail food stores, supermarkets, commissaries, cold storage plants or wherever there's a thru-opening.

All curtains create an individual barrier of high velocity air to reduce windborne dust, pollen, smoke and flying insects from infiltrating food facilities and other clean work areas Helps maintain desired interior temperatures.

- Can be mounted inside or outside exterior doors
- Self contained one-piece high tensile strength PolyMars® housing
- Fire retardant and corrosion proof housing
- Choice of single or three phase

AD36	36"
AD48	48"
AD72	72"

Call for options (motor, micro-switch, on/off controls, etc.)

Over wider doors, use in multiples side by side spaced not more than 6" between units.
