

SHELVING

WIRE SHELVING

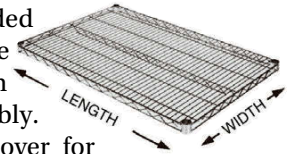

CHOICE OF CHROME OR SILVER EPOXY FINISH

Strong and durable wire storage shelving allows for free circulation of air in a refrigerated walk-in or dry storage area. Ideal for linens, paper products, cleaning supplies, canned and bottled goods, seasonings and sauces. Can be easily installed as a standard, basic free-standing unit, as continuous shelves or numerous combinations of corner installations (see accessories below). Shelves are completely adjustable so you can customize your own unit by adding more shelves and posts to standard units.

COMPLETE UNITS SHIPPED KNOCKED-DOWN. Easy to assemble.

SHELVES

Open wire reinforced shelves feature front and back welded surface ribs for added strength. Shelves can be easily adjusted if you'd like to vary clearance between shelves. Shelves adjust to 1" increments. Easy assembly. Shelf clips snap on post allowing shelf collar to slide over for a secure fit. Each shelf holds 700 lbs. of evenly distributed weight.

POSTS

Rugged 1" diameter steel posts are grooved at 1" increments for easy adjustment. Posts are 74" high and fitted with non-marking floor levelers and plastic post caps. Casters available - see accessories.

CHROME FINISH

Electro plated nickel-chrome finish for both a hard and durable finish. Economically priced. Recommended for dry storage areas.
