

# MEAT GRINDERS/TENDERIZER

## TENDERIZER

Standard tenderizer knives cut deep into the fresh meat to slice fibers and sinews. Just two passes through makes a tender, eye appealing, very saleable product from less expensive, harder to merchandise cuts.

Standard knife rollers also become knitting rollers by simply changing the stripper position. "Knitting" cuts and bonds two pieces of meat to form one.

- Motor shuts off when safety cover is raised
- On-Off toggle switch with cover safety switch
- Stainless steel case with transparent Lexan safety cover
- Stainless steel cutting group, spacers and comb
- Motor: 1/2 HP
